## **Job Openings**

### **About Us:**

NOCCi Balasore Infrastructure Company, a Special Purpose Vehicle (SPV) of the Government of India, operates a state-of-the-art Tool Room for precision machining of critical components. We invite applications from experienced and competent candidates for the following positions:

---

## **1. Marketing Executive – Tool Room**

### **Key Responsibilities:**

- Plan and implement marketing initiatives across multiple platforms.
- Identify potential clients, generate leads, and secure sales for Tool Room products & services.
- Develop and maintain sales and marketing plans for Odisha and neighboring states.
- Maintain strong client relationships, understand technical requirements, and provide support.
- Conduct market research on industry trends and competitors.
- Prepare quotations, arrange client meetings, and track sales targets.
- Analyze sales data and prepare reports.
- Ensure timely communication with clients and management.

### **Required Qualifications & Skills:**

- Diploma/Degree in Mechanical/Production/Manufacturing/Tool Engineering or equivalent.
  - 3–6 years of sales & marketing experience in mechanical products/engineering components.
  - Strong communication, negotiation, and interpersonal skills.
  - Good understanding of tool room processes and market dynamics.
- 

## **2. Fitter**

### **Key Responsibilities:**

- Interpret technical drawings and assemble metal components.
- Fabricate and install machinery, frames, and other structural parts.
- Operate tools for cutting, shaping, and assembling components.
- Perform welding, repairs, and functionality testing.
- Ensure compliance with quality and safety standards.

### **Required Qualifications & Skills:**

- ITI (Fitter) with 3–6 years of relevant experience.
  - Ability to read engineering blueprints and use precision tools.
  - Strong problem-solving and analytical skills.
- 

### **3. CNC Programmer cum Operator (*Fanuc Controller*)**

#### **Key Responsibilities:**

- Create and modify CNC programs (G-code, M-code).
- Set up machines, tools, and fixtures; load materials.
- Monitor machining processes and make adjustments for quality.
- Inspect parts using precision measuring instruments.
- Maintain production and program records.

#### **Required Qualifications & Skills:**

- ITI/Diploma in Mechanical Engineering or CNC Programming course.
  - 3–6 years of CNC programming and operation experience.
  - Strong troubleshooting skills and precision focus.
- 

### **4. VMC Programmer cum Operator (*Fanuc Controller*)**

#### **Key Responsibilities:**

- Program and operate VMC machines.
- Interpret engineering drawings and determine tooling requirements.
- Perform tool changes, axis adjustments, and parameter settings.
- Inspect finished products for accuracy and quality.
- Maintain equipment and ensure smooth workflow.

#### **Required Qualifications & Skills:**

- ITI/Diploma in Mechanical Engineering or VMC Programming course.
  - 3–6 years of VMC programming and operation experience.
  - Strong knowledge of precision measuring tools.
- 

### **Salary:**

- ☐ **Best in the industry** – No constraint for deserving candidates.
-
